

Line Bore Engineering Services

78 Winona Rd

8 February, 2016

Mt Eliza VIC 3930

Dear valued customer,

As you may be aware, I have had some health issues over the past few months. As such I have not been able to provide the same level of service to my valued customers as I have in the past.

Being due for retirement, I have decided to pass the business on and it is my pleasure to introduce Jim Harris as the new owner of Line Bore Engineering Services. Jim comes with considerable engineering experience, having established and run Coastal Engine Service for 12 years. He has also worked extensively on ships and major installations around Australia as a machinist and mechanical fitter, predominantly in the oil and gas sector as well as the earthmoving sector.

Having established Line Bore Engineering in 1997, it has been my pleasure to provide an efficient, cost effective and accurate service to my many customers over the last 19 years. I am sure this will continue as I have seen Jim take all the knowledge I have passed on with ease during the recent handover period, and I will continue to provide support to the business as long as required.

On a closing note I wish to thank you for your continued support and the relationships that we have forged over the last 19 years. It is with some regret I move on from the business but I know you will be in good hands with Jim. From the bottom of my heart I thank you, and wish you all the best for the future.

Yours Faithfully

Bob Irving
